

# PRICES REALIZED

## 1999 to 2008

Prices are primarily from eBay and our twice yearly auctions, but a few other sources are also included. This is not a comprehensive list. Prices have been rounded, eliminating the cents. No effort has been made to identify sources. This list of prices realized is offered as a guide only. Conditions are not noted, and these could affect prices realized.

While this is a pretty good indicator of rarity, many other tokens were offered for sale, but did not sell. These are not reflected in the "populations" below. The tokens that went unsold on eBay are still a part of the market and must be taken into consideration when trying to establish a value.

OB = Opening Bid. When an item sells for the opening bid, it is not a true indication of value. All that is shown is that there was one buyer at that price. The buyer could have been bored and not added anything to his collection in a while, or all other bidders were asleep and missed a good buy.

Hoard tokens: Some interesting hoards have turned up in the last 10 years. The Willis and Welch tokens from Cleary, Chatanika and Long are generally not reported in this listing. Their prices are all over the board. After years of hiding (we have known about this hoard for years), the Taylor, Drury & Pedlar tokens from Whitehorse have finally hit the market, steadily decreasing in price realized or opening bid. Jake Nafsted of Tonsina seems to have been absorbed by the market, unless there are more out there. Finally, rumours of a hoard in Skagway (Rapuzzi) hangs over the market, probably depressing some token prices and collectors.

Tokens previously thought rare to scarce (by this writer at least) showed up at auction with interesting frequency. Circle B-1a comes to mind. With repeated appearances, tokens have generally decreased in price realized, although this is not always the case. In other cases, the prices realized have been held artificially high by the opening bid.

Catalogue numbers are from "Alaska Tokens" by Ronald J. Benice, 2nd edition, 1994.
